

International Society for Sanitation Studies Annual Conference 2022

Call for Abstracts

The *International Society for Sanitation Studies (ISSS)* was launched in April 2022. The significance of addressing sanitation is articulated in the United Nations' Sustainable Development Goal 6 which states that we should "Ensure availability and sustainable management of water and sanitation for all." We have less than 10 years to reach this 2030 goal, and it seems quite doubtful that we will.

ISSS aims to bring a broad range of stakeholders together to tackle global sanitation through a truly inter- and trans-disciplinary approach recognizing that sanitation must be viewed through the nexus of Health, Materials and Socio-culture. We, therefore, open a Call for Abstracts to interested persons and organizations willing to present at the ISSS Annual Conference 2022.
